

Saeco Aulika Coffee Machine

(Medium sized offices)

Coffee Machine Description

Aulika is a professional automatic machine designed for the Office market, and is the expression of the high quality of Saeco technology. It is equipped with a brewing unit with preinfusion and electronic regulation of coffee in the cup. It is also equipped with the "one-touch milk" dispenser function, which is compatible with the office requirements, and with a hot water wand.

Aulika is operated through a direct selection keypad, with an easily read display and can work both autonomously or in water net. connection version. The machine is supplied with an autonomous 4-litre tank and a grounds drawer that has a capacity of up to 40 coffee cakes.
