

Saeco Phedra Coffee Machine

(Medium sized offices, or with multi user environments)

Coffee Machine Description

The Saeco Phedra is the perfect coffee machine for canteens, sports clubs, medium sized offices and businesses with multi-users or self serve environments.

The Saeco Phedra is an impressive looking table-top vending machine with optional coin operation.

As a "bean to cup" automatic machine, and along with PureBean's quality freshly roasted coffee beans, the Saeco Phedra makes a great tasting coffee at the push of a button.

The Saeco Phedra Fresh Milk model comes with cappuccinatore (auto milk frother) transforming milk into a thick creamy foam.

With 3 powder canisters, the Saeco Phedra can also be used for any combination of hot chocolate, chai tea latte and soups. It also comes as a vending milk model with 2 spare canisters for hot chocolate and chai or soup.

The elegant dispensing area is high and wide reducing coffee spills and mess around the coffee machine.
